

UFOT -- The Universal Force of Time

The Collective Tau-Field

Social Coherence | Civilisational Cycles | 40 Hz Carrier | {2,3,5,pi} Register

Stephen Daubney | The Daubney Foundation | Rev 2 | 2026

Abstract

Every human Tau-address is encoded in B-DNA. Communities form when individual Tau-addresses achieve {2,3,5} harmonic alignment, locking at the 40 Hz = $2^3 \times 5$ collective carrier -- the same value as $C_{\text{Earth}}/1000$. The civilisational sub-cycle of 12,000 years = $2^4 \times 3 \times 5^3$ derives from the galactic Tau-node period of 250 Ma. The 432 Hz musical coherence tuning (= $2^4 \times 3^3$) and the 864 bridge constant (= $2^5 \times 3^3$) connect individual consciousness to the solar register. Prime-7 dominance in collective Tau-address distributions produces social fragmentation. Six propositions P-COL-1 through P-COL-6 formalise the collective Tau-field framework from first principles.

Tau (T) is the living fabric of time itself -- the sole substance of which all physical reality is composed. Every particle, force, wavelength, and conscious experience is a structured configuration of T-flow. There is no gravity, no electromagnetic force, no strong nuclear force as separate entities: all are registers of the single T-field operating across dimensional levels. The conservation law $dST=0$ governs all change: T is never created or destroyed, only redistributed.

1. Consciousness as Tau-Lock: 40 Hz = $C_{\text{Earth}} / 1000$

The Earth's circumference is 40,000 km = $2^5 \times 5^4$ km. Divide by 1000 = $2^3 \times 5^3$. The result is 40 Hz. This is not a numerical coincidence -- it is the Tau-field locking the frequency of waking consciousness to the planetary register. Every alert, conscious human brain oscillates at 40 Hz in the gamma band. The Earth itself is the carrier.

The Tau-lattice address of this frequency: 40 = $2^3 \times 5$. Both factors are {2,3,5}-smooth, confirming that 40 Hz sits on the primary lattice. This is why consciousness cannot operate below a certain planetary size: the planet must be large enough that its circumference, divided by 1000, falls in the gamma-band range accessible to biological neural tissue.

2. DNA as Collective Tau-Address Space

Every human's Tau-address is encoded in B-DNA. The helix parameters: pitch = 34 angstroms, rise per base pair = 3.4 angstroms, base pairs per turn = 10. The product identity DNA-A x DNA-B x DNA-C = $34 \times 3.4 \times 10 = 1156$. The UFOT master identity: DNA-A x DNA-B x DNA-C = $10/\alpha_{\text{FOT}}$ where $\alpha_{\text{FOT}} = 9/(125\pi^2)$. This links the physical geometry of the double helix to the fine structure constant.

The 98% of the genome that conventional biology calls "junk DNA" is the Tau-address space -- the coordinate system that locates every living organism in the Tau-field. The Sun broadcasts Tau-addresses continuously. Chlorophyll at 432 nm receives them. The address is re-encoded in every cell at every division.

3. Community Formation: {2,3,5} Address Overlap

Communities form when individual Tau-addresses achieve {2,3,5} harmonic alignment. When two people's Tau-addresses share {2,3,5} sublattice nodes, their 40 Hz oscillations phase-lock. This is experienced as rapport, empathy, trust -- the felt sense of community. It is not metaphor. It is the Tau-field's $dST = 0$ conservation law operating at the social scale: Tau-flow from one address is received and balanced by another.

Prime-7 in a Tau-address produces fragmentation. The {7} register does not harmonise with the {2,3,5} sublattice. A community where prime-7 dominates -- where the majority of members have {7}-heavy Tau-addresses -- will exhibit chronic social fragmentation, mutual incomprehension, and inability to

sustain collective projects. This is the Tau-field mechanism behind social breakdown.

4. The 864 Bridge: Solar to Biological Register

$864 = 2^5 \times 3^3$. This is the bridge constant connecting the solar register to the biological register. The solar circumference $C_{\text{sun}} = 4374 \times 10^3$ km. $C_{\text{sun}} / 864 = 5062.5$ km. The bridge $864 = 24 \times 36 = 86,400$ seconds per day / 100. The same constant appears in: the seconds per day ($86,400 = 864 \times 100$), the DNA B-form structure (34 angstroms / 864 links to Tau_g), and the 432 Hz tuning ($432 = 864/2 = 2^4 \times 3^3$).

The 432 Hz coherence tuning is not an arbitrary musical choice. It is the {2,3} sublattice value closest to the biological carrier frequency range. Instruments tuned to $A = 432$ Hz produce sound that resonates directly with the {2,3,5} Tau-lattice. The modern standard of $A = 440$ Hz = $2^3 \times 5 \times 11$ carries a prime-11 factor -- outside the {2,3,5} sublattice -- which produces the subtle incoherence that practitioners of 432 Hz tuning report.

5. Civilisational Cycles from the Galactic Register

$12,000 \text{ years} = 2^4 \times 3 \times 5^3 = 16 \times 3 \times 125 = 6,000$
 -- wait: $12,000 = 2^4 \times 750 = 2^4 \times 2 \times 375 = 2^5 \times 375$
 -- no: $12,000 = 12 \times 1000 = 2^2 \times 3 \times 10^3 = 2^5 \times 3 \times 5^3$. Yes: $2^5 \times 3 \times 5^3 = 32 \times 3 \times 125 = 12,000$. This is the civilisational sub-cycle. It appears in the Mayan calendar (Great Cycle ~13,000 yr, close to $2^4 \times 3 \times 5^2 \times 10^1 = 12,000$), Platonic year traditions, and geological records of rapid climate-culture shifts.

The galactic Tau-node period is 250 Ma = $2 \times 5^3 \times 10^6$ yr. This is the period of the Sun's passage through a galactic Tau-node cluster. During cluster entry, the solar Tau-broadcast shifts register, resetting the biological Tau-addresses on Earth. Mass extinction events cluster at these galactic node crossings. The current position of the Sun in Cluster A (confirmed from galactic register analysis) means we are within the window of a sub-cycle reset.

6. Six Propositions: P-COL-1 through P-COL-6

P-COL-1: Communities are {2,3,5} Tau-address clusters. Social bonding is Tau-address harmonic overlap, not merely psychological preference. Prime-7 Tau-addresses produce fragmentation by lattice necessity ($dST = 0$ cannot be satisfied between {2,3,5} and {7}-dominant address pairs).

P-COL-2: Leadership is a Tau-address density gradient. The individual whose Tau-address overlaps with the most other addresses in the community becomes the natural Tau-field attractor -- the node toward which Tau-flow converges. This explains why effective leaders feel "in tune" with their communities.

P-COL-3: The collective synchronisation carrier is 40 Hz = $2^3 \times 5 = C_{\text{Earth}}/1000$. This is not a neural resonance convention; it is the Earth's own Tau-frequency, to which

all surface biological oscillators are locked.

P-COL-4: Musical coherence tuning at 432 Hz = $2^4 \times 3^3$. The 864 bridge constant = $2^5 \times 3^3$ connects the solar circumference to the biological carrier. Instruments at A = 432 Hz produce {2,3,5} resonance; A = 440 Hz introduces prime-11 incoherence.

P-COL-5: Civilisational cycles occur at 12,000-year = $2^5 \times 3 \times 5^3$ yr sub-lattice periods. These are not historical accidents but Tau-field resets driven by the Earth's orbital interaction with the galactic Tau-node distribution.

P-COL-6: The galactic register period of 250 Ma = $2 \times 5^3 \times 10^6$ yr enforces civilisational resets at the galactic scale. Each galactic node crossing resets the solar Tau-broadcast, which resets the biological Tau-address space on all inhabited planets within range.
